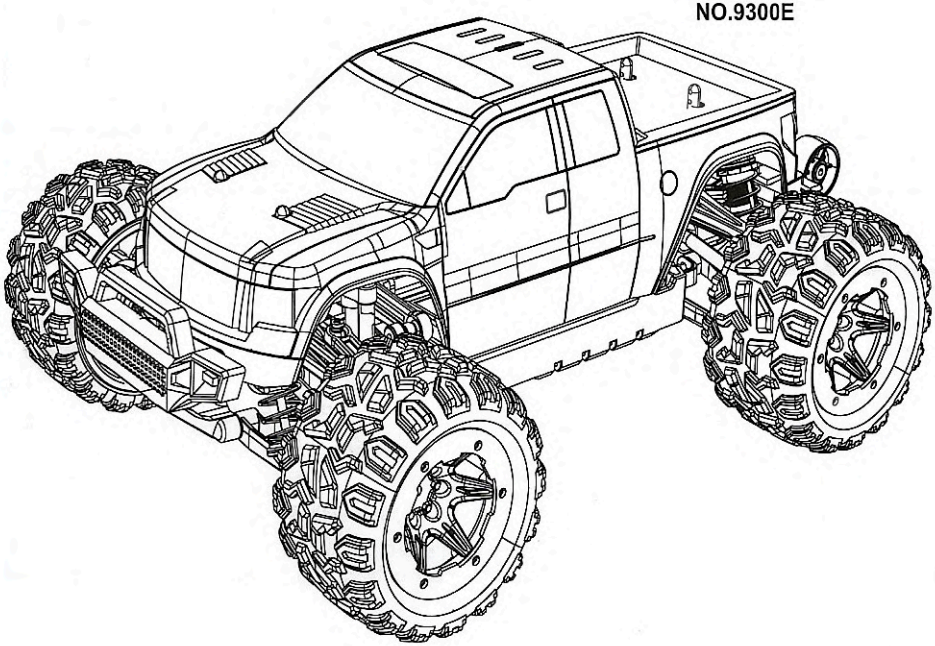
PRODUCT MANUAL

4WD OFF ROAD CAR

2.4GHz RADIO SYSTEM

1:18 RC CAR

NO.9300E



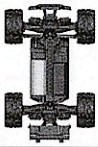
WARNING: PLEASE READ THE INSTRUCTION MANUAL CLEARLY BEFORE OPRATING THE PRODUCT

PREFACE

To make your experience with this remote control car as easy and convenient as possible, please read the instructions provided before using the product. Enjoy and have fun with the product while keeping the manual for future maintenance and reference.

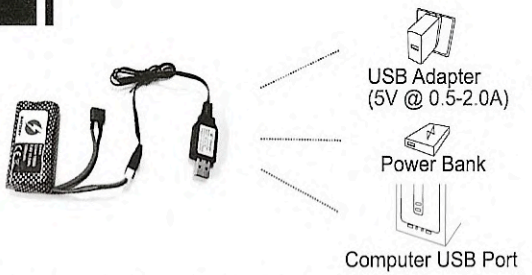
1. In order to protect the legitimate rights and interests of users, please be sure to carefully read the contents of this manual before using this product.
2. When using this product, please be sure to strictly observe and perform the requirements which includes but not limited to the instructions and safety guidelines. For any personal injury, accident, property loss, legal dispute, or any other adverse event causing a conflict of interest resulting from the use of the product or any irresistible factors that are in violation of the safety instructions, the user shall bear the related responsibilities and losses. ENOZE will not take any responsibility.
3. Once you start using the product, you are deemed to have read, understood, recommended, and accepted all terms and contents of the instructions (including disclaimers, safety instructions, warning instructions, etc.) included with this product.
4. In case you are having challenges on any aspect of the product, may it be operation or maintenance, please contact your local sales agent or contact customer support at ENOZE.

PACKAGE CONTENTS

RC Car	Remote Control	USB Charging Cable	Battery	Product Manual	Accessory package

CHARGING

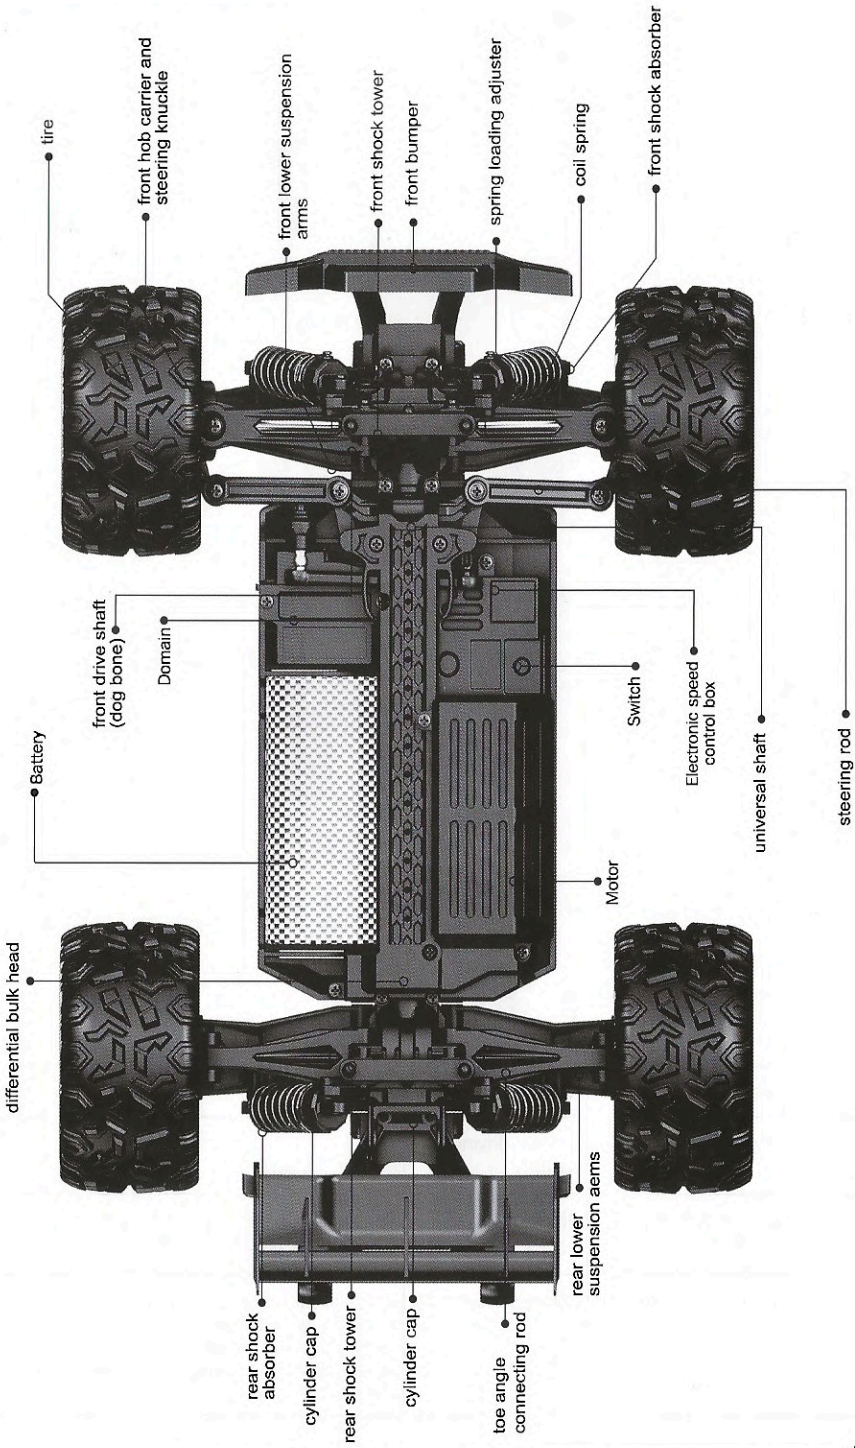


The battery isn't fully charged when it's made. When the car **battery low**, the car will start the LVC (Low Voltage Cutoff) protection function to protect the battery, the car can **only turn, not forward and backward**. Please charge the battery.

1. Plug the USB charging cable into the USB charging port of the computer, power bank or USB adapter (5V@ 0.5~2.0A).
2. Connect the battery wire to the USB charging cable.
3. Charging time: about 180 minutes.
4. The green indicator light on the USB charging cable will flash when it is charging and will turn soild once fully charged.

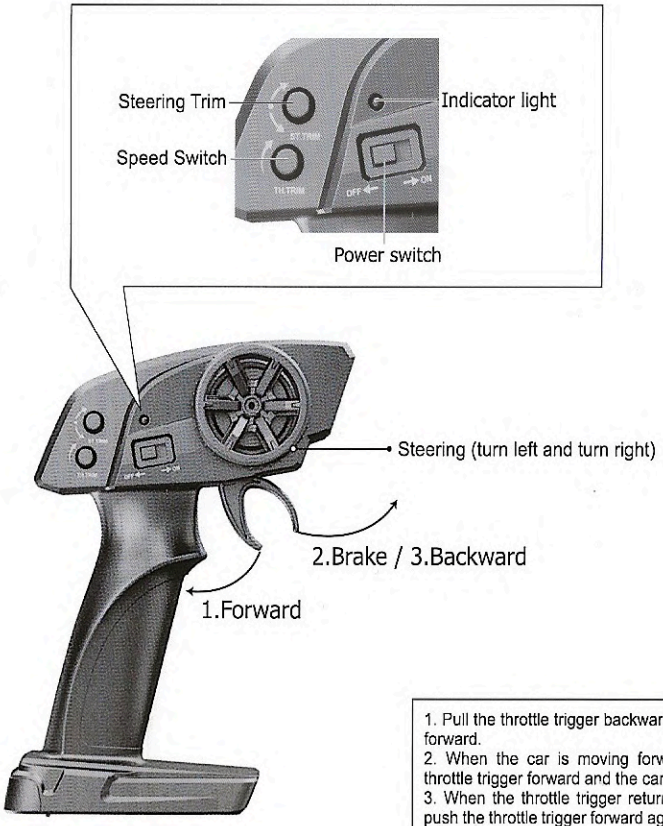
ATTENTION:
- Please keep the battery in sight when charging. DO NOT put the battery on a flammable surface.
- If battery pack and USB charging cable are damaged, immediately stop using it and replace the accessories as soon as possible.

RC CAR'S DETAILS



REMOTE CONTROL FUNCTIONS

REMOTE CONTROLLER



1. Pull the throttle trigger backward, the car goes forward.
2. When the car is moving forward, push the throttle trigger forward and the car will brake.
3. When the throttle trigger returns to midpoint, push the throttle trigger forward again and the car will go reverse.

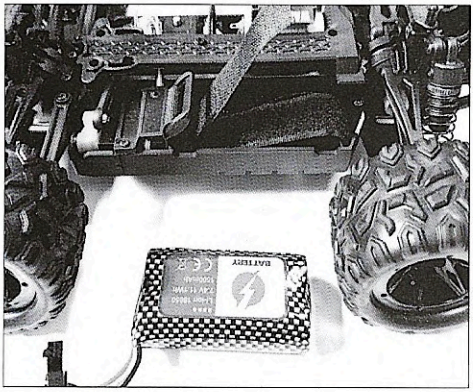
REMOTE LED CODES

LED color/pattern	Name	Hints
Red light always on	Normal driving pattern	
Red light with slow flash (on at 0.5s/off at 0.5s)	Hint of low power	For more information m please refer to operation of putting new battery into remote
Red light with quick flash (on at 0.125s/off at 0.125s)	Connect failed/error	If transmitter and receiver are bound unsuccessfully, please close the remote system and restart for recovering normal operation. Please check exceeding scope, low battery or damaged antenna if the connection is failed.

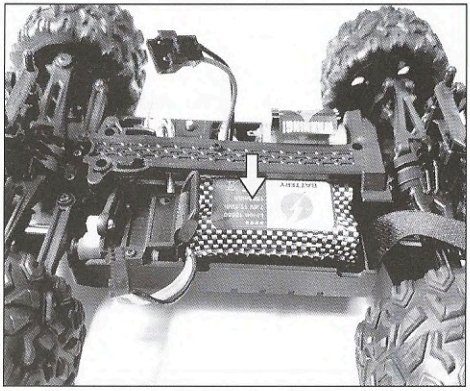
BATTERY INSTALLATION

RC CAR BATTERY

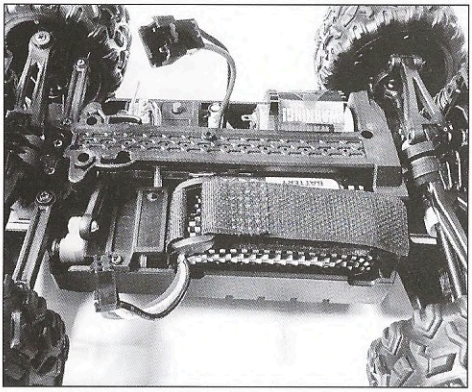
If the car will not be used for a long time, make sure to turn it off and remove the battery.



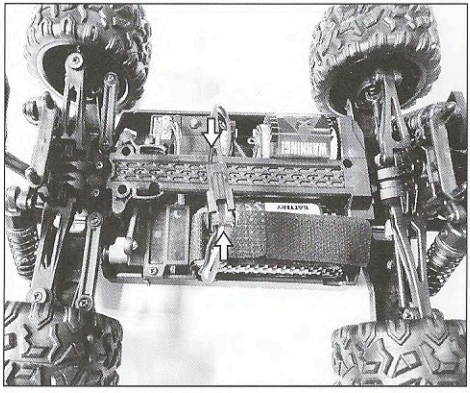
1.Open the nylon tie.



2.Installation of batteries.

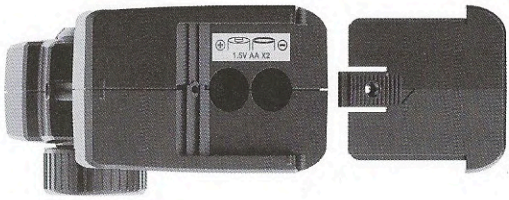


3.Tension Nylon Ties.



4.Insert the battery plug.

REMOTE CONTROL BATTERY



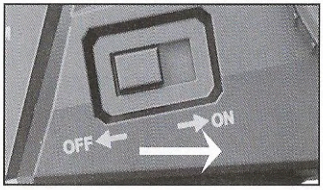
① Push the battery cover out.
② Insert 2 AA batteries (not included) in the correct direction.
③ Push the battery cover in.

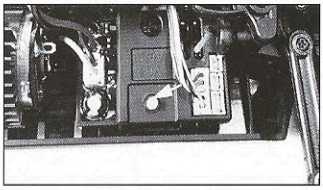
If the remote will not be used for a long time, make sure to turn it off and remove the batteries.

When the battery of the remote control is low, the indicator light of the remote control will flash slowly.

OPERATION

PAIRING

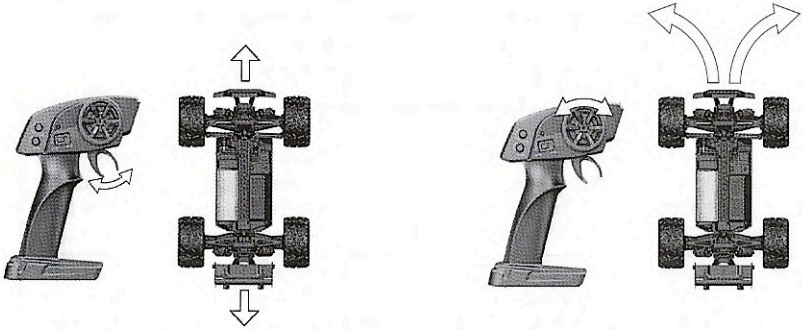




① Make sure the battery is charged.
② Insert batteries to the car and the remote.
③ Turn on the car power switch and the remote power switch. (**DO NOT pull the throttle trigger during pairing**)
④ Both will automatically pair. (The remote power indicator and the car power indicator will flash while waiting for the pairing process and will turn solid once pairing has been successful)

OPERATION

FORWARD, REVERSE, TURN LEFT, TURN RIGHT



Pull the throttle trigger backward, the car goes forward. Push the throttle trigger forward, the car brakes, then push the throttle trigger forward again, the car goes reverse. (The throttle controls the speed)

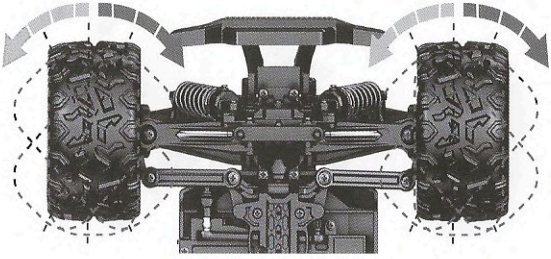
Turn the steering control wheel counterclockwise, the car turns left. Turn the steering control wheel clockwise, the car turns right. (Control the Steering Wheel Rotation Angle can control the degree of turning)

MAXIMUM SPEED CONTROL

Turn the speed switch counterclockwise to reduce the maximum speed of the car.

Turn the speed switch clockwise to increase the maximum speed of the car.

STEERING TRIM



If while the car is moving forward and veering to left then turn the steering trim konb to the right until the car is moving straight. If while the car is moving forward and veering to right then turn the steering trim konb to the left until the car is moving straight.

FREQUENTLY ASKED QUESTIONS

QUESTION	CAUSE	SOLUTION
No match or can't control it	1. The car battery or remote control battery is completely dead 2. Out of remote range	1. Replace charged battery 2. Repair and keep in remote distance
Can't go forward or reverse	1. Low battery 2. The car shorted out when it got wet 3. Poor contact between motor and electronic regulator	1. Charging 2. Let the car dry completely 3. Reconnect the connection wire between the motor and the electronic regulator
Can't turn left or turn right	1. Low battery 2. The car shorted out when it got wet 3. Poor contact between steering gear and electronic regulator	1. Charging 2. Let the car dry completely 3. Reconnect the connection wire between the steering gear and the electronic regulator
It won't charge	1. The output voltage or current of the power supply is too high 2. The charging cable or battery is broken	1. The output voltage and current of the power supply should be 5V 0.5~2A 2. Contact ENOZE Customer Service
Something's missing or broken		1. Contact ENOZE Customer Service
The wheels turn on their own	Pull the throttle trigger during pairing	Repair without pulling the throttle

WARNINGS

1. According to the instructions provided on the manual. Some part needs to be assembled and adjusted by adults.
2. Please use under the guidance of an adult.
3. Please promptly put away the packing materials so as not to cause harm to children.
4. Do not operate on a location where water is trapped or under the rain. Parts of the product may malfunction if exposed to water.
5. Do not touch the rotating wheel to avoid injury.
6. The product contains small parts that may pose a risk of ingestion or suffocation.
7. To remotely control the product on the road or in a crowd to avoid accidents.
8. It is necessary to periodically check the charging USB cable, plug, housing and other components, and immediately unplug if found to be damaged.
9. This product can only use the factory configured USB cable to charge the product battery.
10. USB cable, battery box, and battery must be inserted into the same specified power supply as the product symbol.
11. The USB charging cable and the battery is not a toy.
12. Disconnect the rechargeable USB cable before cleaning the toy.
13. If you observe electrical charges during product usage, turn off the device immediately.
14. When installing or replacing the battery, pay attention to the correct polarity of the battery.
15. The remote control car uses a 7.4V Lithium battery.
16. It is strictly prohibited do the following actions such as but not limited to disassemble, modify, crash, puncture, drop, throw in a fire or any other means of causing damage to the product to avoid harm to the user and other participants.
17. Do not expose the battery to prolonged exposure to sunlight to prevent danger.
18. It is advisable to store the battery at a temperature below 30°C. Do not store it in a place with heat, high temperature, or humidity to avoid danger.
19. Non-rechargeable batteries cannot be charged.
20. When charging a rechargeable battery, adult supervision is required.
21. The rechargeable battery should be removed from the toy before charging.
22. Do not mix old and new or different types of batteries.
23. Only use the USB cable configured by this product when charging the battery.
24. Do not disassemble the battery or modify the battery to avoid risk of fire or explosion.
25. After the battery is used, it should be taken out of the remote control car. After cooling the battery, you can then charge it and placed it on a safe location. Unplug the battery outlet from the USB charging cable when not in used and disconnect the power line.
26. Stop using the battery as soon as it gives a foul smells or suddenly becomes hot, deformed, discolored, or otherwise abnormal during use or charging.
27. After the battery of the remote controller runs out, battery temperature is usually high and would recommend to wait for
30 minutes before charging the battery again. Otherwise, it may damage the battery.
28. Drained batteries should be removed immediately.
29. Do not cause the electrical supply of the wiring port to short circuit.
30. If you do not use the product for a long time, remove the batteries of the remote control car and remote control.
31. instructions contains important product information, please give time to read for better product experience.

GENERAL INFORMATION

FCC Notice:
This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
---Reorient or relocate the receiving antenna.
---Increase the distance between the equipment and receiver.
---Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
---Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This device should be installed and operated with minimum distance 20cm between the radiator & your body.

IC Notice:
This device complies with Canada Industry licence-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference; and
(2) this device must accept any interference. Including interference that may cause undesired operation of the device.

CAN NMB-3 (B)
RF Exposure
Radiation Exposure Statement:
This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

BATTERY WARNING:
1. Failure to follow all the instructions may result in serious injury, irreparable damage to the battery and may cause a fire, smoke or explosion.
2. Always check the battery's condition before charging or using it.
3. Replace the battery if damaged, gives a foul odor or show signs of overheating, discoloration, deformation and leakage.
4. Never use anything other than the approval charger the battery. Always use a balancing charger for battery. It is recommended that you do not to use any other charger than the one provided with the product.
5.The battery temperature must never exceed 60°C (140°F) otherwise the battery could be damaged or ignite.
6. Never charge on a flammable surface, near flammable products or inside a vehicle (perferably place the battery in a non-flammable and nonconductive container).
7. Never leave the battery unattended during the charging process. Never disassemble or modify the housing's wiring, or puncture the cells. Always ensure that the charger output voltage corresponds to the voltage of the battery. Do not overcharge the batter that may cause short circuit.

8. Never expose the battery to moisture or direct sunlight, or store it in a place where temperatures could exceed 60°C(car in the sun, for example).
9. Always keep it out of reach from children.
10. Improper battery use may result in a fire, explosion or other hazard.
11. Non-rechargeable batteries are not be charge again. Rechargeable batteries are only to be charged with the supervision of an adult.
12. Different types of batteries or new or used batteries which are different are not be mixed.
13. Batteries are to be inserted with the correct polarity.
14. The supply terminal should be used well to avoid short circuit. Examination of the transformer and battery charger regularly is encouraged to check any damage in the cord, plug, enclosure and other parts. If damage is observed, it must not be used until it has been repaired.
15.The packaging has to be kept since it contains important information.
16.The toy is only to be connected to Class II equipment bearing the symbol.
